Portfolio: portfolio-react-rho-drab.vercel.app

Professional Summary

Data Analyst with 1+ years of experience in SQL, Power BI, Python, and Business Intelligence. Experienced in analyzing 50L+ records, building KPI dashboards, automating reporting workflows, and delivering data-driven insights. Skilled in stakeholder management, reporting, data validation, and predictive analytics.

Core Technical Competencies

SQL: Joins, CTEs, Window Functions, ETL, Query Optimization, Views
Power BI: DAX, Power Query, Data Modeling, KPI Dashboards, Reporting
Python: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Pyspark, Beautiful soup(bs4) Selenium
Analytics: Data Cleaning, Data Validation, EDA, Ad-hoc Analysis, Root Cause Analysis
Tools: Excel (Advanced), Google sheet, Power BI, Git, GitHub, Jupyter Notebook, VS Code

Work Experience

Paytm

Jan 2025 – Mar 2026

Data Analyst

Noida, India

- Analyzed and processed **50L+ records** using **SQL, Python, and Excel** to support **merchant risk analysis**, business reporting, and operational decision-making.
- Developed and maintained **Power BI dashboards** and reports tracking **KPIs**, operational metrics, and high-risk merchant cases for business stakeholders.
- Automated **reporting workflows**, reducing manual effort by **60%** and saving **10+ hours per week** through process optimization.
- Performed **data validation, data quality checks, anomaly detection**, and **SQL query optimization** to improve reporting accuracy and efficiency.
- Partnered with **stakeholders and leadership** to deliver **ad-hoc analysis**, define business metrics, and provide actionable insights supporting data-driven decisions.

CETPA Infotech

Aug 2024 – Jan 2025

Data Science Intern

Noida, India

- Performed **data cleaning, preprocessing, and exploratory data analysis (EDA)** using Python.
- Developed predictive models and improved performance by **25%** through feature engineering and optimization.
- Automated analytical workflows and implemented **data quality checks** to improve reporting accuracy.

Projects

Credit Risk Modeling System | Python, XGBoost, Scikit-learn, Streamlit

- Developed a machine learning-based **Credit Risk Prediction System** to identify high-risk loan applicants.
- Performed **data cleaning, feature engineering, and exploratory data analysis** on financial datasets.
- Built and evaluated **Logistic Regression, Random Forest, and XGBoost** models achieving strong ROC-AUC performance.
- Implemented **SMOTE and class-balancing techniques** to improve minority-class prediction accuracy.

SQL Data Warehouse Project | SQL Server, ETL

- Designed and implemented a modern **data warehouse** using Bronze, Silver, and Gold architecture layers.
- Built **ETL pipelines** and analytical views to support business intelligence and reporting use cases.
- Developed **fact and dimension tables** using dimensional modeling techniques to enable efficient analytical querying.

American Express Customer Analytics Dashboard | Power BI, DAX

- Developed an executive **Power BI dashboard** analyzing customer spending patterns, revenue trends, and retention metrics.
- Created interactive KPIs, drill-through reports, and advanced **DAX measures** for business insights.
- Implemented dynamic filtering and data visualizations to enable stakeholders to monitor performance and identify growth opportunities.

Education

Vellore Institute of Technology, VIT

Aug 2020 – July 2024

B.Tech in Computer Science — CGPA: 7.8
